Management

COMMUNITY

Member, Flatirons Community
Church
Couples Group participant
Church volunteer

Designing brands. Solving problems. Creating possibilities.

A designer and developer who sees potential where others see limitations—and who is energized by the projects others believe cannot be done.

PROFESSIONAL PROFILE

Graphic Designer and Web Developer with experience spanning brand identity, digital design, print, photography, web development, marketing, and business ownership. Combines strong artistic ability with technical problem-solving to move projects from rough idea to complete, usable solution. Known for determination, unconventional thinking, attention to detail, and the ability to take on complex assignments that others avoid. As a member of Flatirons Community Church, motivated by the opportunity to contribute creative work in a culture grounded in shared faith, mission, and values.

FEATURED CREATIVE WORK

Ingrain Wood Co.

Built the brand from the ground up, including identity, website, product concepts, packaging, signage, brochures, social media, product imagery, mockups, and complete creative direction.

PROFESSIONAL EXPERIENCE

Independent Brand Designer & Business Owner

2017 - Present

Ingrain Wood Co. / Custom Creative Ventures

Created complete brand identities, websites, marketing materials, signage, packaging, brochures, product mockups, and social content.

Led creative direction from initial concept through production, balancing aesthetics, usability, materials, and customer experience.

Produced product photography and image-based marketing assets for owned brands and business ventures.

Managed multiple projects, client communication, budgeting, schedules, and production details independently.

Digital Producer

2014 - 2015

Penton Media — Boulder, Colorado

Produced and maintained digital experiences for national trade-show brands using an ASP.NET-based event CMS.

Created custom site enhancements using Drupal and jQuery while integrating branded content, photography, graphics, and event information.

Managed simultaneous production schedules and ongoing updates across multiple event properties.

Web Developer

2012 - 2014

Madwire Media — Loveland, Colorado

Built and refined responsive websites using HTML, CSS, JavaScript, PHP, WordPress, and Drupal.

Translated visual direction into polished, functional front-end layouts and customized user experiences.

Applied SEO best practices and collaborated with clients, designers, and project managers to deliver finished sites.

Web Developer / Data Analyst

2004 - 2012

Verizon Wireless / Alltel Communications

Designed, built, and maintained a company-wide knowledge base used to support technical troubleshooting and daily operations.

Reduced troubleshooting time by approximately 25–35% through internal web tools, improved workflows, and better access to information.

Produced reporting and analytics that contributed to improved customer retention and operational performance.

Received Employee of the Month and additional recognition for knowledge-base management and data analytics.

SELECTED PROJECTS

Office Evolution

Designed, built, photographed, and maintained Drupal websites for approximately 20 franchise and company-owned locations.

Ingrain Wood Co.

Complete brand development, web design, marketing, packaging, signage, product imagery, and promotional materials.

FrameCraft Studio

Brand graphics, brochures, business cards, product presentation, and marketing collateral.

Alltel Knowledge Base

Enterprise information system, internal web development, data reporting, and process improvement.

ADDITIONAL LEADERSHIP EXPERIENCE

Owned and operated remodeling, cabinetry, and service businesses, managing contracts, budgets, schedules, client relationships, custom design decisions, and complex projects from concept through completion. This background strengthened practical problem-solving, craftsmanship, accountability, and the ability to communicate clearly with a wide range of people.
